EXPERIENCE

Lead Developer Sep 2026 - Present
SIC App, University of Makati - github.com/UMak-SIC/sic-app

- Handled **100–200 event registrations** in a single day by building a Postgres-backed ticket email queue with job leases, idempotency keys, retries, and provider failover
- Automated pull request checks and separated production, staging, and dev by building GitHub Actions CI on throwaway Neon database branches with matching Vercel deployments
- Cut check-in wait from **5–10 minutes** in line to **~5 seconds** per student by building emailed QR passes, server-side ticket verification, and attendance tracking

Full Stack Developer Jul 2026 - Aug 2026
Freelance - Katada Transportation Services - katada-van-rentals.vercel.app

- Removed the client's **₱1,000/month** platform fee by delivering a rental system covering bookings, fleet, payments, KPI dashboards, and CSV financial reports using React, TypeScript, and Supabase
- Automated toll estimates by building a geocoded dataset of **97 Philippine toll plazas**, matched against each booking's route
- Stopped double-bookings during concurrent requests by replacing check-then-insert logic with a PostgreSQL exclusion constraint and atomic PL/pgSQL payment RPCs

Dev Specialist Sep 2025 - Apr 2026
Centervert, Greenville, South Carolina (Remote)

- Automated **5 FTEs'** worth of manual data entry via a Supabase Edge Function intake pipeline
- Increased lead intake by **30–40 per day** by building an automated lead intake system using Supabase Edge Functions and GoHighLevel API
- Migrated **460K+ records** to a self-architected Supabase schema, now the CRM's source of truth
- Generated **$1K–$2K** in per-request billing through a Next.js/Stripe change-request-to-invoice pipeline

AWARDS

InfoTechnOlympics 2026 Hackathon - Champion Oct 2026

- Won **Champion, Best Prototype, and Best Presenter** out of **7 teams** by building, in 5 hours, a LangChain retrieval chatbot that answers questions from PDF documents and pulls student details from Technology-Based Learning (TBL) Hub accounts

InfoTechnOlympics 2024, 2025 Java Speed Coding - Champion Nov 2024, Nov 2025

- Won first place **two years in a row** against 10–15 competing pairs by solving easy-to-hard algorithmic problems in Java under a strict time limit

eGovHackathon 2026 - Top 10 Finalist July 2026

- Selected as a Top 10 Finalist in July 2026 at a national-level hackathon for building **eHANDA**, a post-disaster household needs-assessment tool built as an integration to the eGovPH platform.

EDUCATION

Bachelor of Science: Computer Science Major in Application Development Expected 2027
University of Makati - Makati City, Philippines

- Dean's List, 1st & 2nd Sem, 2023-2024
- Dean's List, 1st & 2nd Sem, 2024-2025
- Dean's List, 1st & 2nd Sem, 2025-2026

SKILLS

- Languages & Frameworks: JavaScript, TypeScript, ReactJS, Next.js, Node.js, Express, Hono, Prisma
- Databases: PostgreSQL, MySQL, Supabase, Neon
- Cloud & DevOps: AWS (S3, CloudFront, RDS, Route53, Lightsail), GCP, Docker, Nginx, VPS, GitHub Actions
- Testing: Vitest, Playwright
- Tools: Git, GitHub, Linux, SSH, Vercel, Render, Tailscale
- Other: API Integration, Full-stack Development
